SOFT SKILLS

- Attention to Detail
- Analytical Thinking
- Communication
- Teamwork
- Problem-Solving

PROJECTS

University QR Attendance System

- Web-based QR attendance system using Laravel, PHP, MySQL, HTML, CSS, JavaScript.
- Features: QR code attendance, authentication, real-time tracking

Personal Portfolio Website

- Developed a responsive personal portfolio website using React.js, Vite, and Tailwind CSS.
- Showcased projects, education, certifications, and workshops.
- Integrated EmailJS contact form for direct communication.
- Deployed and maintained using Vercel.
- Technologies: React.js, Vite, Tailwind CSS, JavaScript, HTML5, CSS3, EmailJS, Git, GitHub, Vercel

Open Mind – Mental Wellness Website

- Mental wellness platform using PHP, MongoDB, HTML, CSS, JavaScript, Bootstrap.
- Features: Mood tracking, therapy booking, podcasts, yoga sessions, and admin dashboard.

Hogwarts Camping Website

- Front-end project using HTML, CSS, JavaScript, Bootstrap.
- Features: Responsive UI, multi-page navigation, interactive elements, image galleries.

Fashion Flow – Inventory Management System

- Tested and validated CRUD workflows and authentication features
- Verified database integrity and input validation rules

- Worked with Java Swing UI and MySQL backend during development and testing

Designing a Scalable and Secure Enterprise Network for a Growing IT Training Center

- Designed and simulated an enterprise-level network infrastructure using Cisco Packet Tracer
- Implemented VLAN segmentation for different departments to improve security and network management
- Configured routing, switching, DHCP, and DNS services
- Applied basic network security concepts including access control and secure network design
- Created a scalable topology to support future organizational growth
- Performed network testing and troubleshooting to ensure connectivity and performance
